Laporan Input Data Mahasiswa
Nama : Resky Ayu Dewi Talasari

Kelas : B2

**Nim : 13020180128**

1. **Membuat database**

2. **Membuat Tabel**

3. **Membuat project**

4. **Membuat class config.java sebagai koneksi database**

```
import java.sql.Connection;
import java.sql.DriverManager;
import java.sql.SQLException;

public class config {
    private static Connection mysqlconfig;
    public static Connection configDB()throws SQLException{
        try {
            String url="jdbc:mysql://localhost:3306/mahasiswa";
```

```java
            String user="root"; //user database
            String pass=""; //password database
            DriverManager.registerDriver(new com.mysql.jdbc.Driver());
            mysqlconfig=DriverManager.getConnection(url, user, pass);
        } catch (SQLException e) {
            System.err.println("koneksi gagal "+e.getMessage());
        }
        return mysqlconfig;
    }
}
```

5. Membuat jframe class

6. Membuat class mhsGui

```java
import java.awt.HeadlessException;
import java.sql.Connection;
import java.sql.SQLException;
import javax.swing.JOptionPane;
import javax.swing.table.DefaultTableModel;

public class mhsGUI extends javax.swing.JFrame {
    public mhsGUI() {
        initComponents();
        load_table();
        kosong();
    }
    private void load_table(){
        // membuat tampilan model tabel
        DefaultTableModel model = new DefaultTableModel();
        model.addColumn("No");
        model.addColumn("NIM");
```

```java
        model.addColumn("Nama");
        model.addColumn("Jenis Kelamin");
        model.addColumn("Prodi");

        //menampilkan data database kedalam tabel
        try {
            int no=1;
            String sql = "select * from tabel_mahasiswa";
            java.sql.Connection conn;
            conn = (Connection)config.configDB();
            java.sql.Statement stm=conn.createStatement();
            java.sql.ResultSet res=stm.executeQuery(sql);
            while(res.next()){
                model.addRow(new
Object[]{no++,res.getString(1),res.getString(2),res.getString(3),res.getString(4)});
            }
            tab1.setModel(model);
        } catch (SQLException e) {
        }
        }
    private void kosong(){
        txtnim.setText(null);
        txtnama.setText(null);
        pro.setSelectedItem(this);
        txtfak.setText(null);
    }

    /**
     * This method is called from within the constructor to initialize the form.
     * WARNING: Do NOT modify this code. The content of this method is always
     * regenerated by the Form Editor.
